LETS KIT™ Convenience Pack

an economical and proven option to provide rapid topical anesthesia

LETS Therapy is a combination of these four powders to create a stable solution for topical anesthesia:

- Lidocaine Hydrochloride USP – 4 g
- Epinephrine Bitartrate USP – 180 mg
- Tetracaine Hydrochloride USP – 500 mg
- Sodium Metabisulfite NF – 75 mg
  *All are preweighed

**LETS Therapy vs TAC (Tetracaine, Adrenaline, and Cocaine)**

- Equal in providing and maintaining anesthesia when treating facial lacerations
  
- Free of controlled substances
- Cost-effective
- One simple package that contains all ingredients
- Easy to compound by the simple addition of water
- Solution may be easily thickened to gel with the addition of methylcellulose, sodium carboxymethylcellulose or other appropriate gelling agent
