

PentraVan® Plus Cream Base

Fagron's liposomal transdermal vanishing cream

PentraVan® Plus Cream Base is a higher viscosity version of PentraVan® Cream Base; it uses the same liposomal technology as PentraVan® Cream Base, but with additional emulsifiers to allow for incorporation of higher concentrations (>25%) of APIs and solvents. PentraVan® Plus Cream Base vanishes into the skin, enhancing penetration of the APIs without leaving a sticky residue on the skin.

Benefits of PentraVan® Plus Cream Base

- Allows for incorporation of higher concentrations (>25%) of APIs and solvents
- Provides a different route of administration
- Compatible with broad range of APIs
- Time-saving; no need to weigh and mix multiple ingredients
- Elegant skin feel. Non-greasy, vanishing quickly.

Pentravan[®] Plus Cream Base

Unique benefits of Pentravan[®] Plus Cream Base

- Simple three-step compounding process
- Compatible with a broad range of APIs
- Allows for incorporation of higher concentrations (>25%) of APIs and solvents
- Provides a different route of administration
