Lipopen Anhydrous Base

Lipopen Anhydrous Base is a non-aqueous penetrating vehicle that offers a convenient option when compounding with Active Pharmaceutical Ingredients (APIs) that are poorly stable in water, or when an anhydrous base is prescribed or desired. Lipopen Anhydrous is creamy, smooth, non-tacky, partially-occlusive and easy to apply. While providing enhanced API penetration, this vehicle quickly absorbs into the skin leaving it powdery soft and free of odor.

Benefits of Lipopen Anhydrous Base

- Completely anhydrous to promote API stability
- Penetration enhancing
- Elegant and quickly absorbing
- Petrolatum free
