# Hydrophilic Ointment Base

## DESCRIPTION

Hydrophilic Ointment Base is a traditional oil-in-water emulsion containing petrolatum and propylene glycol. It is easy to spread and water-washable.

Hydrophilic Ointment Base can accept some water to create a thinner base for compounding topical lotion preparations.

## CATEGORY

An oil-in-water ointment base with petrolatum and propylene glycol.

## INGREDIENTS

- Fatty Alcohol
- Propylene Glycol
- Surfactant
- Petrolatum
- Water
- Preservatives
- Rheology Modifier
- Emulsifier

## QUALITIES
